

"Nuovo": apre una nuova immagine. Consente, inoltre, di impostare l'eventuale colore/immagine di sfondo.

Sul sito
www.photofiltre.com sono
disponibili diversi plug-ins
contenenti pattern
(immagini che accostate
creano trame utilizzabili
come sfondo).

"Apri": apre un'immagine salvata su disco o presente su un supporto removibile (ad esempio un cd-rom).

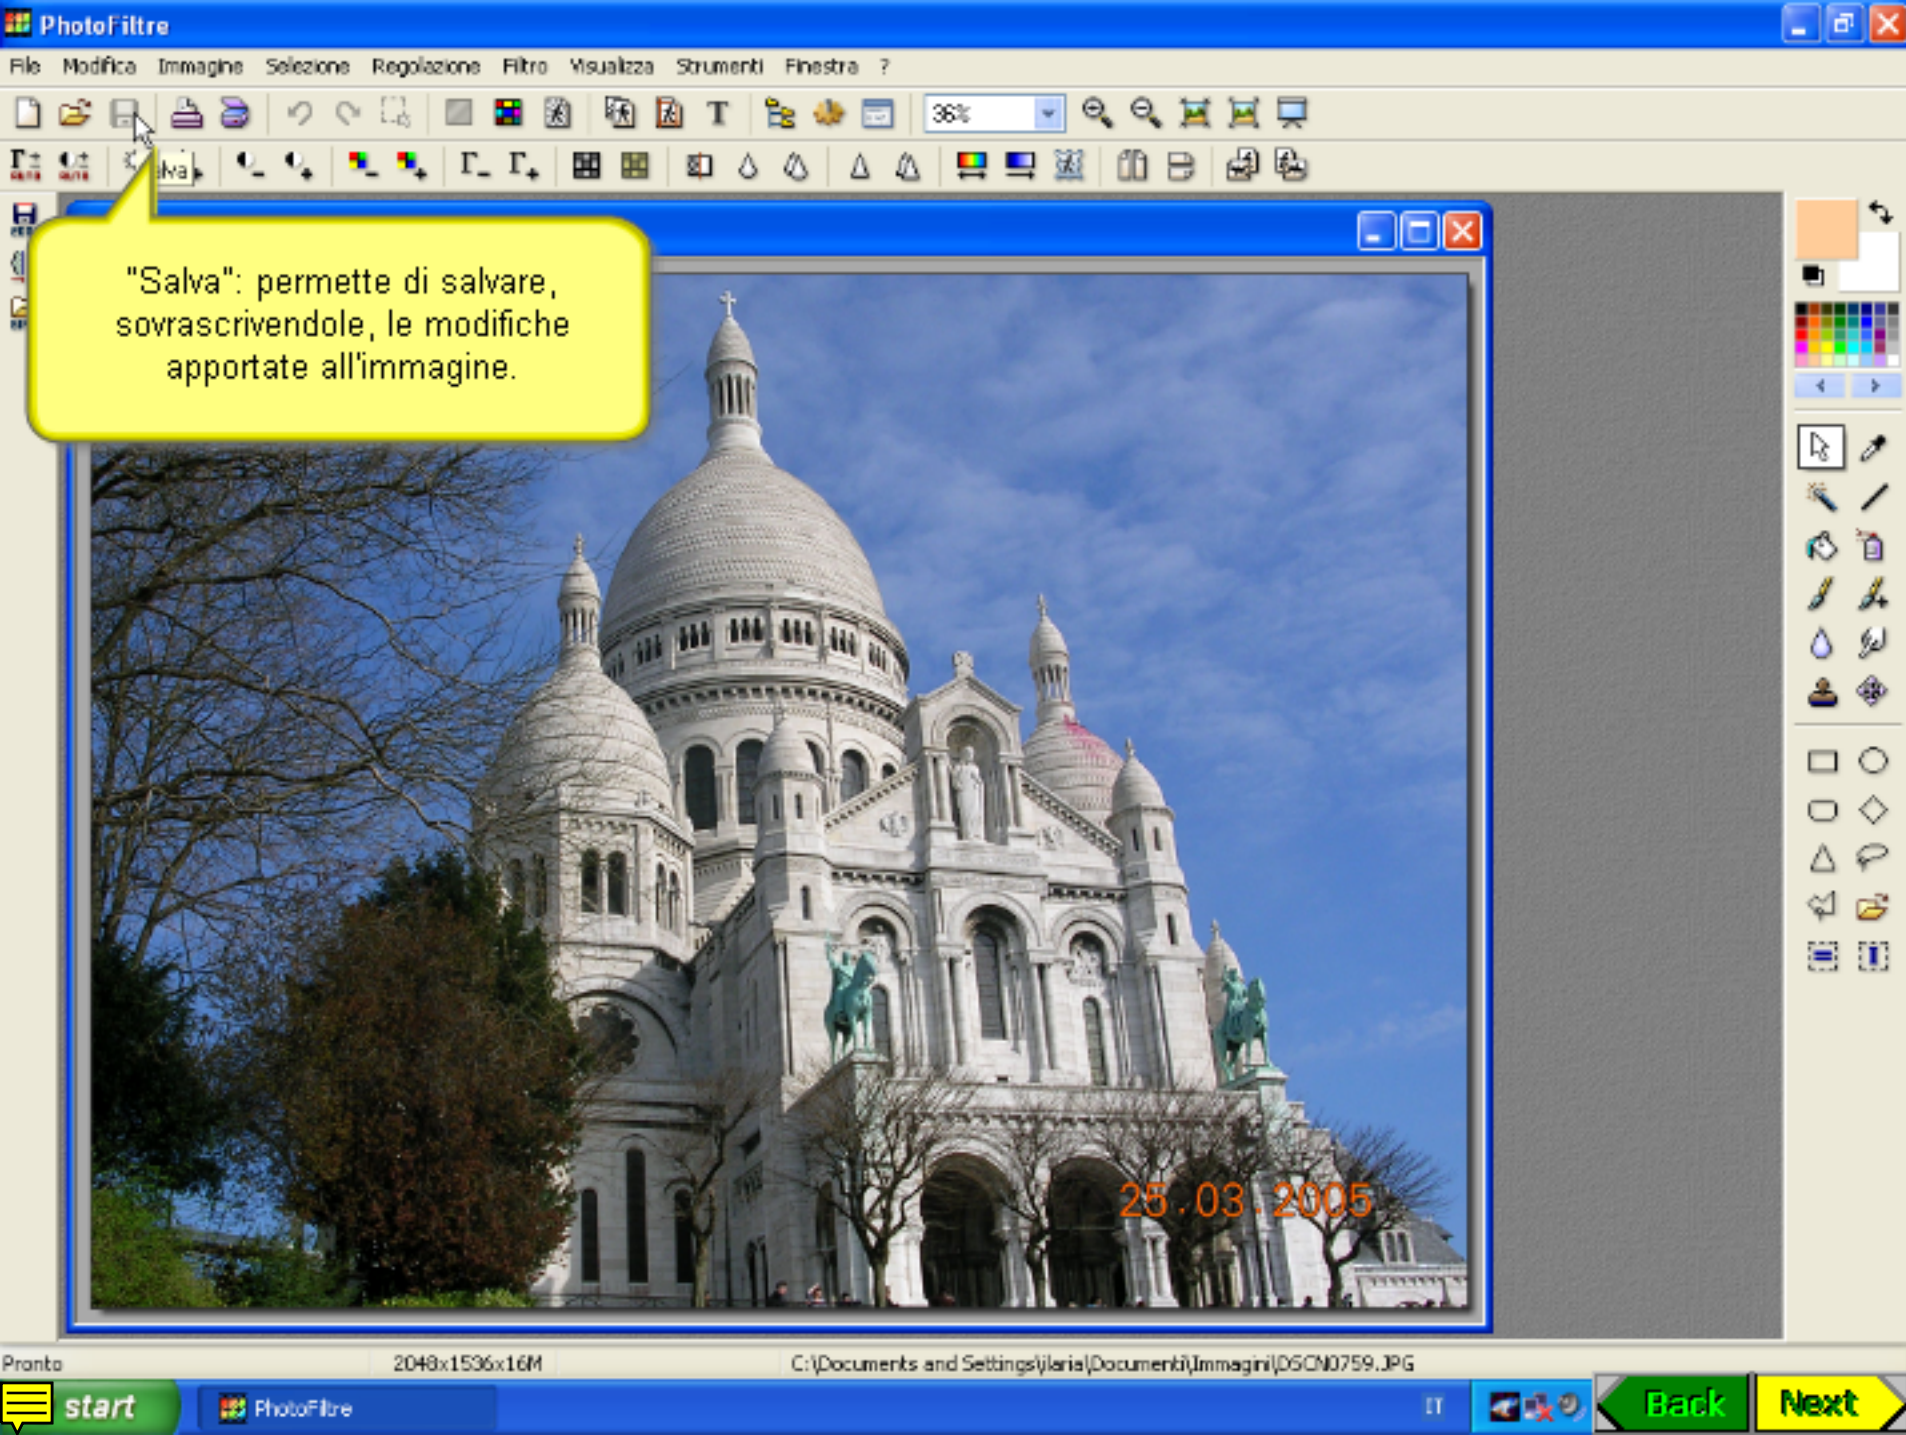

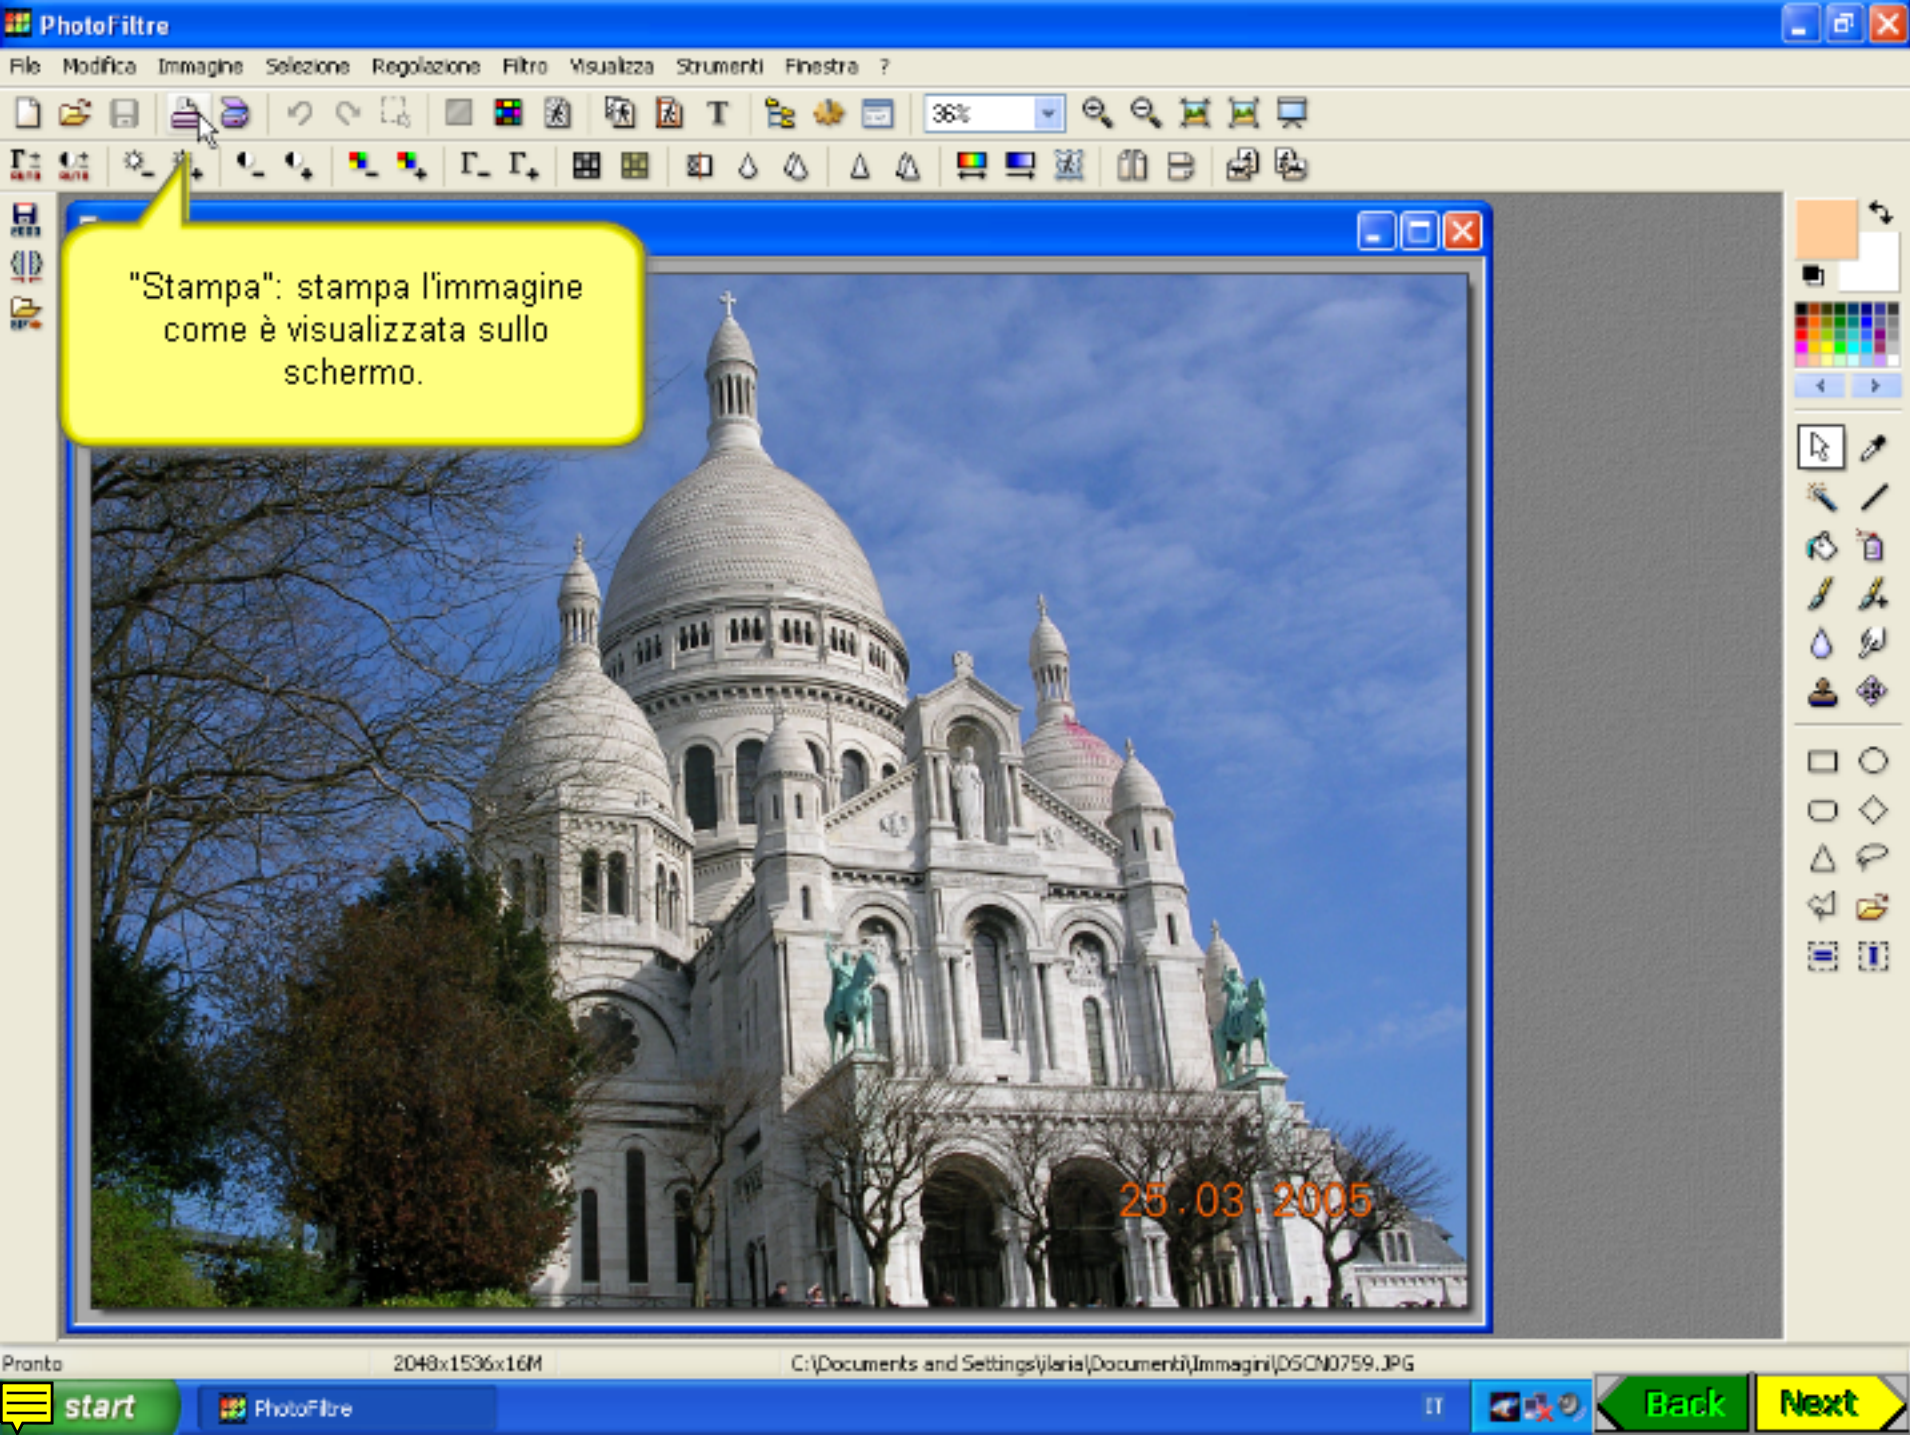

DSCN0759.JPG

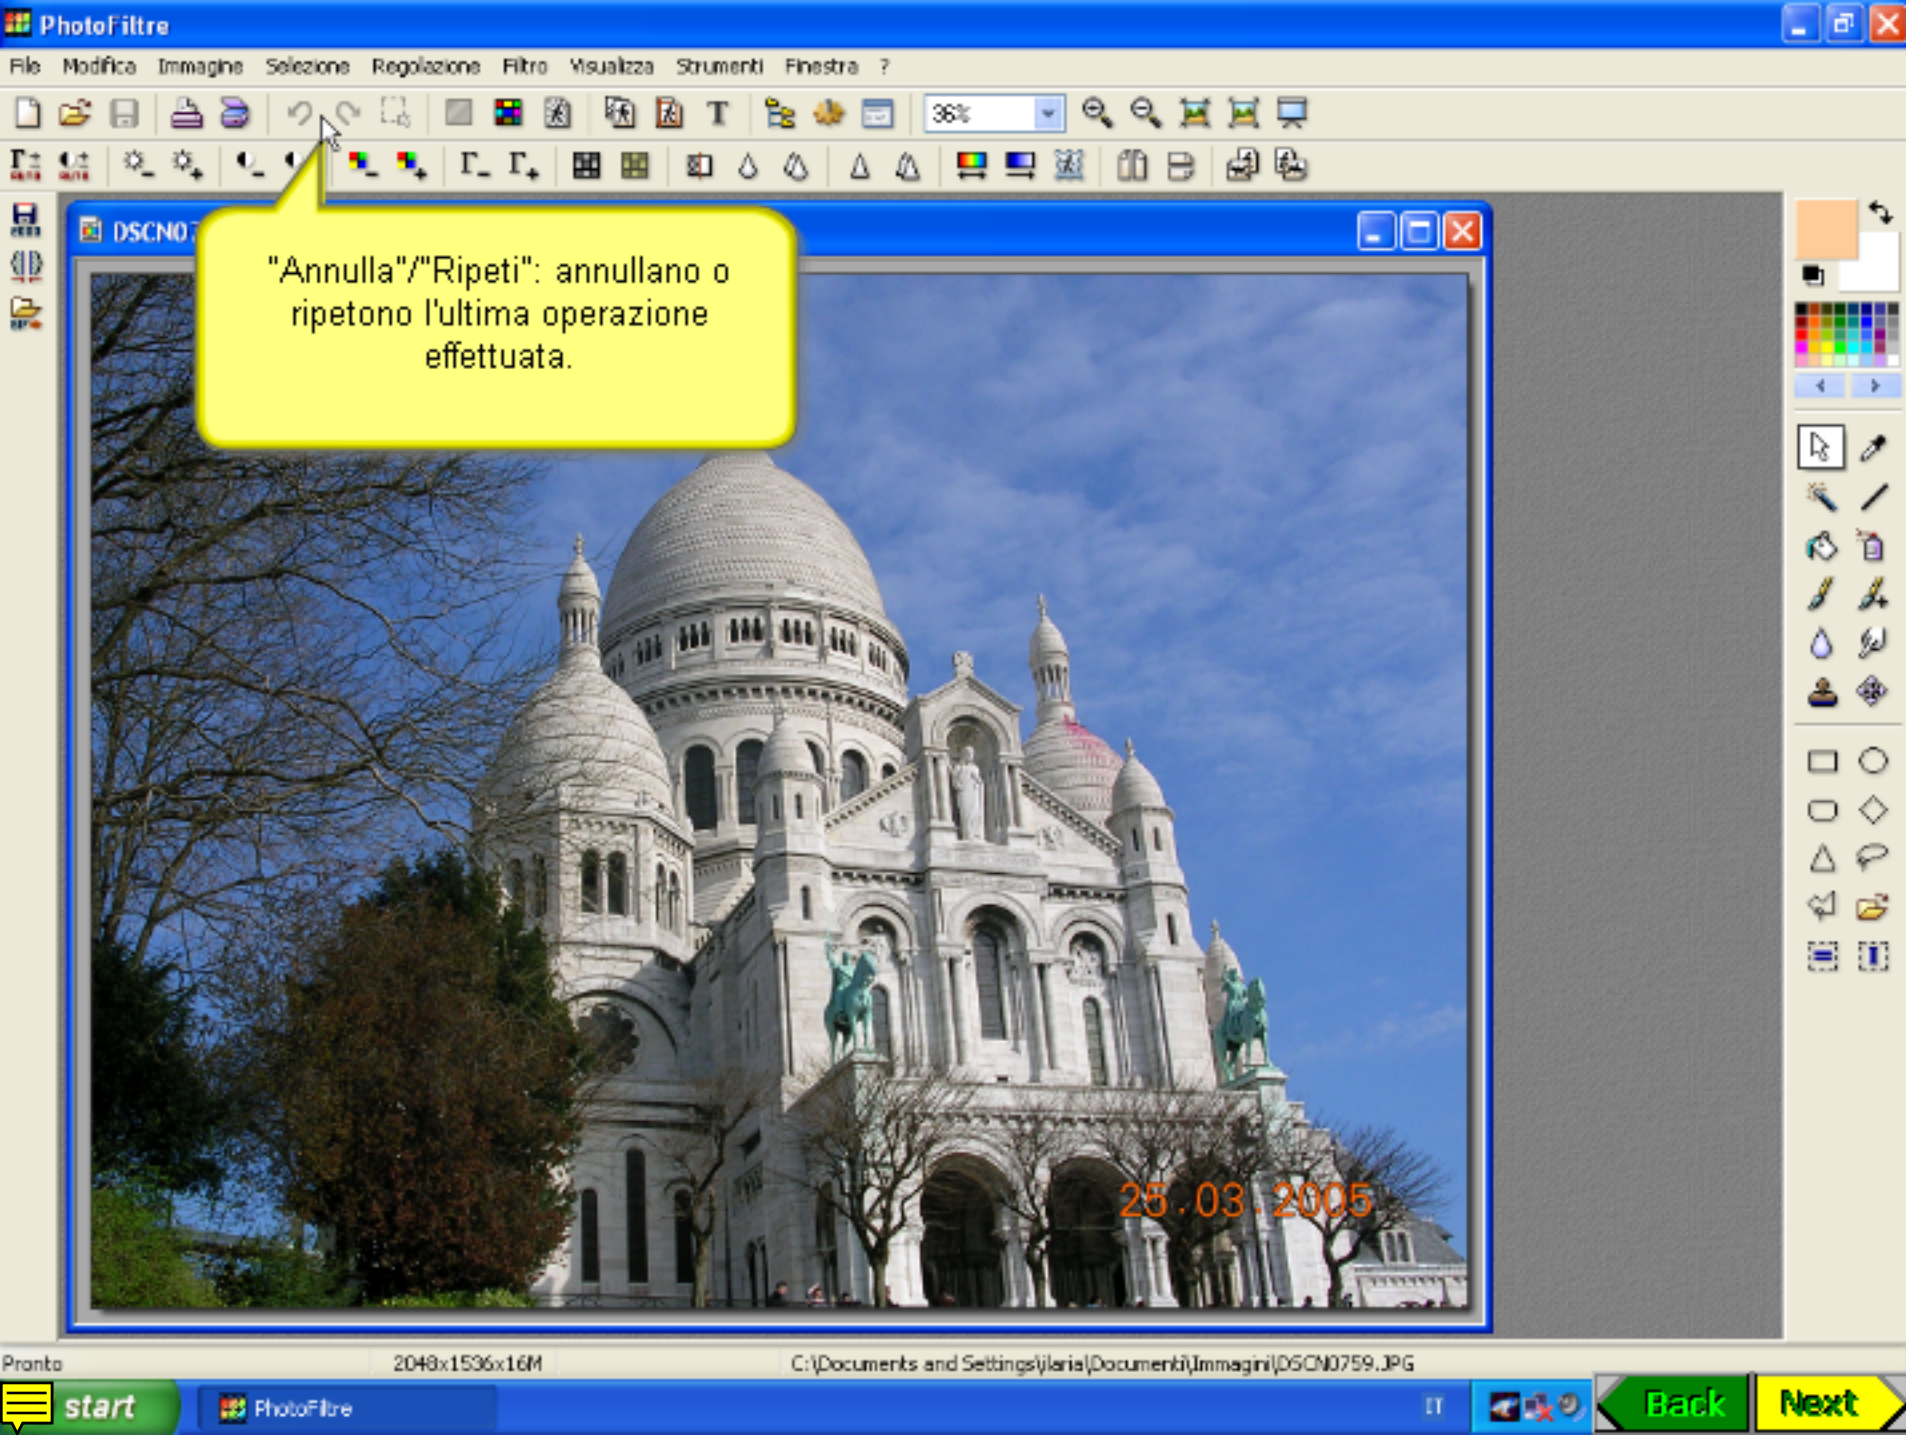

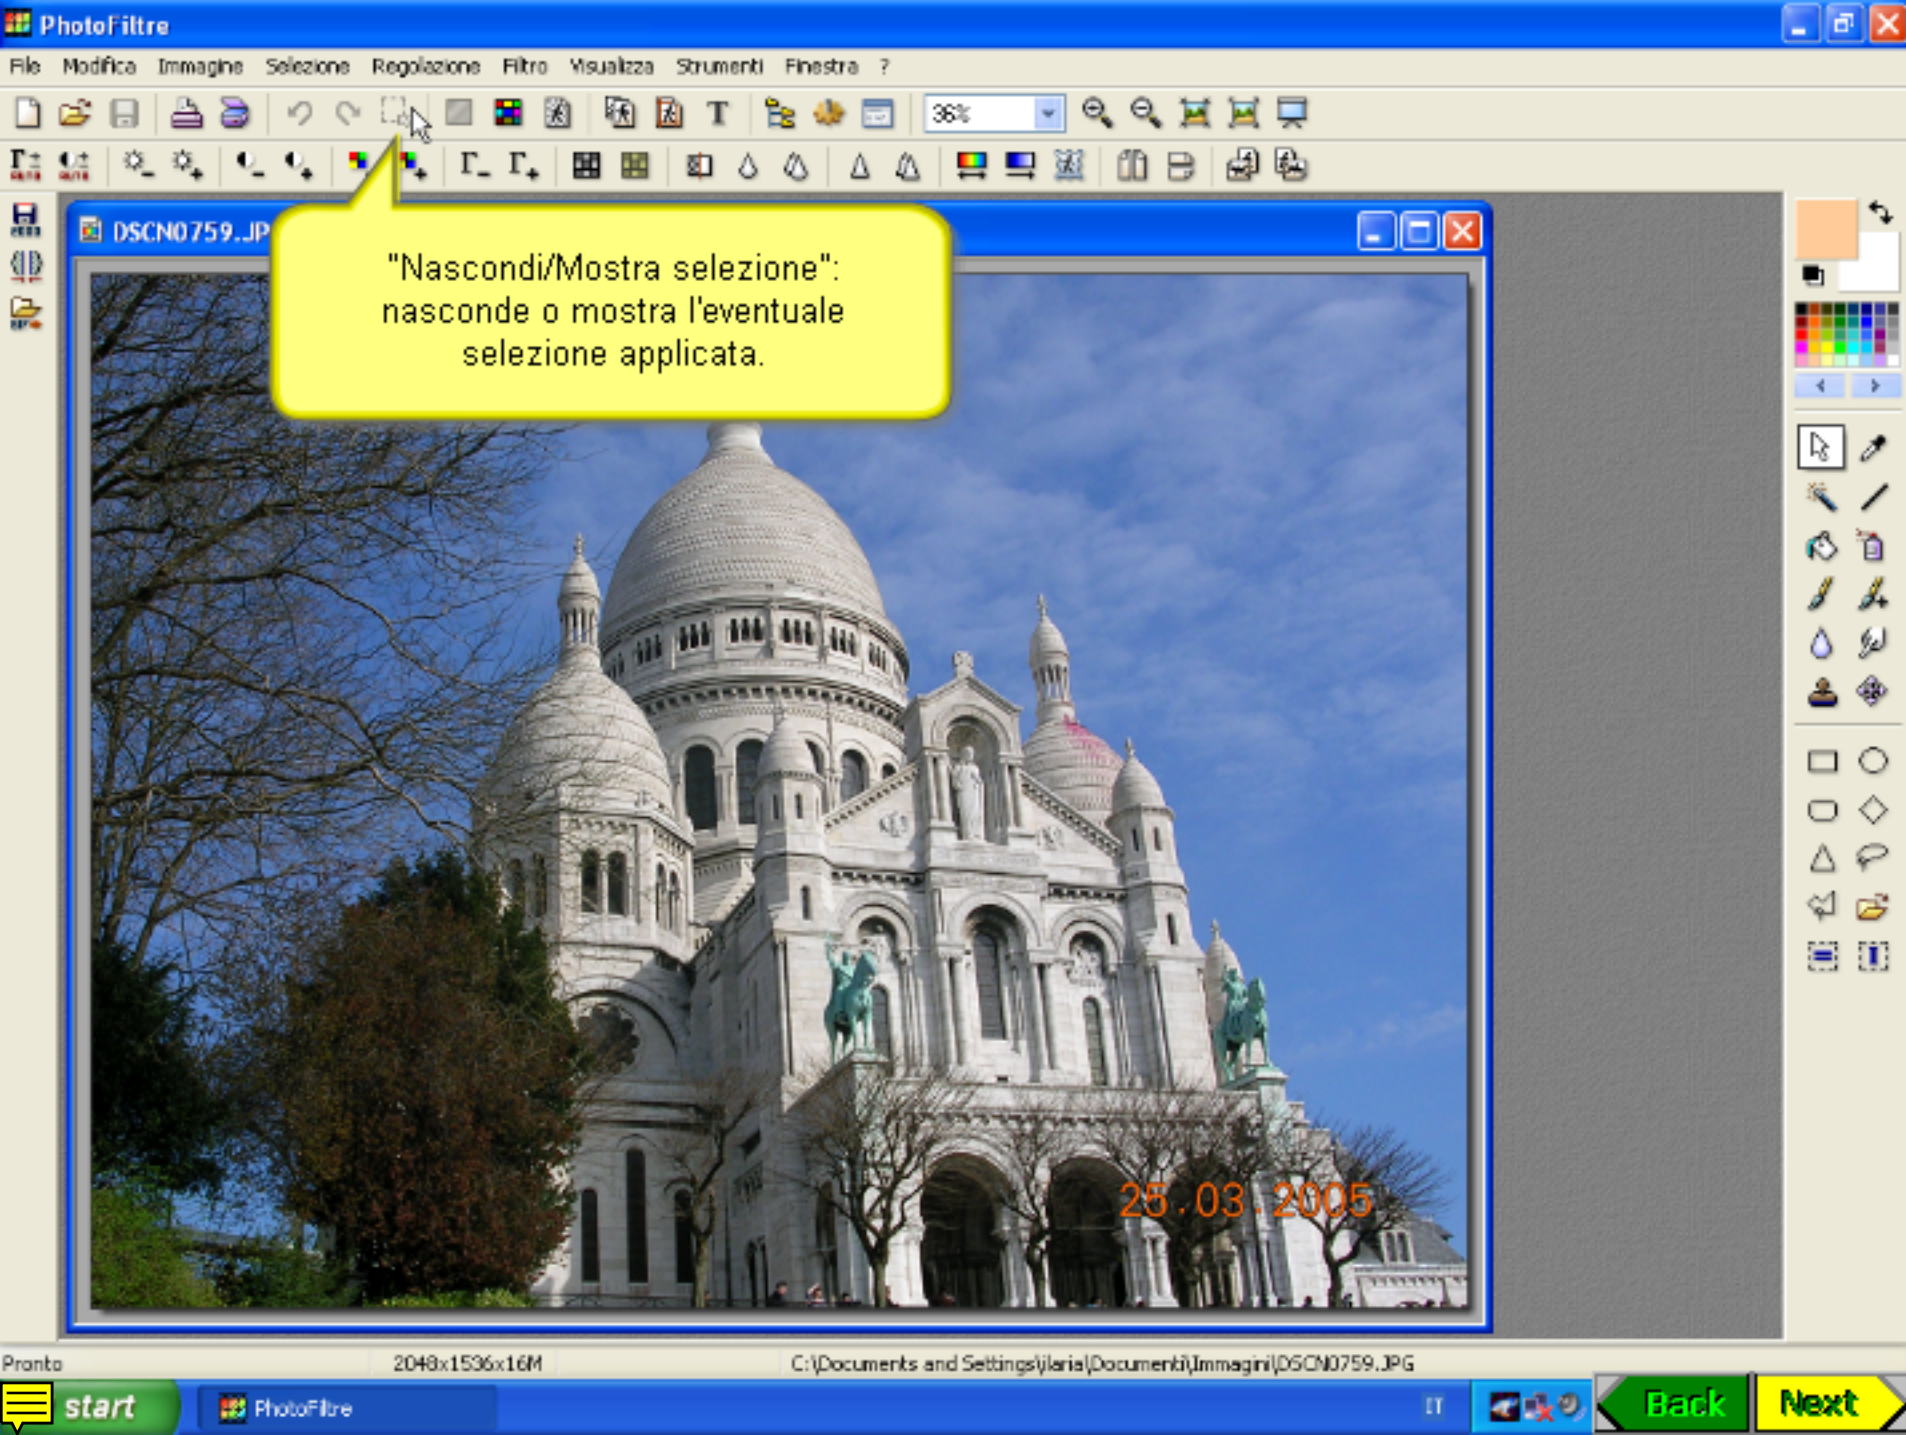

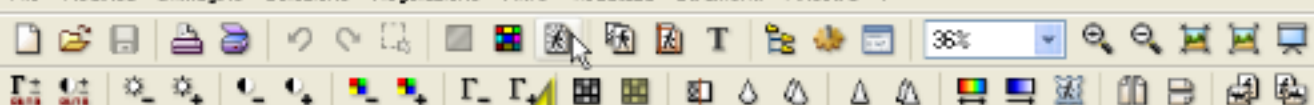

"Acquisisci immagine": importa immagini da supporti come scanner o macchine fotografiche digitali.

DSCN0759.JPG

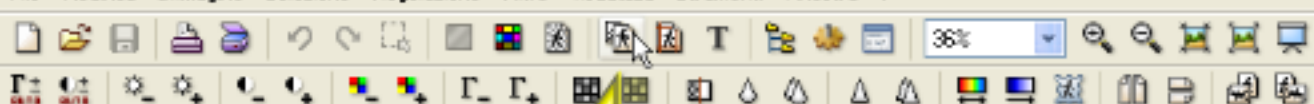

"Colore di trasparenza": rende trasparenti i colori selezionati.

Si tratta di una funzione importante perchè permette di modificare immagini facendole apparire con un contorno irregolare anzichè rettangolare (applicazione utile per le Gif, che in questo modo possono essere utilizzate su pagine web con lo stesso colore di sfondo della pagina).

25.03.2005
